Karçevik Metal

Karcevik Metal LLC. was founded in 1994. Karçevik Metal increases its product range and quality to be able to respond to all the needs of its constantly-increasing number of customers and works non stop to increase its service quality to the highest level with its more affordable price and faster service philosophy.

Karçevik Metal, doing business with “High quality service at all times” philosophy, has devoted itself to taking steps towards larger goals today in the iron and steel industry by combining the energy and knowledge of its dynamic, young and experienced staff with the strength and trust it takes from its customers, just like yesterday.

OUR VALUES ARE:

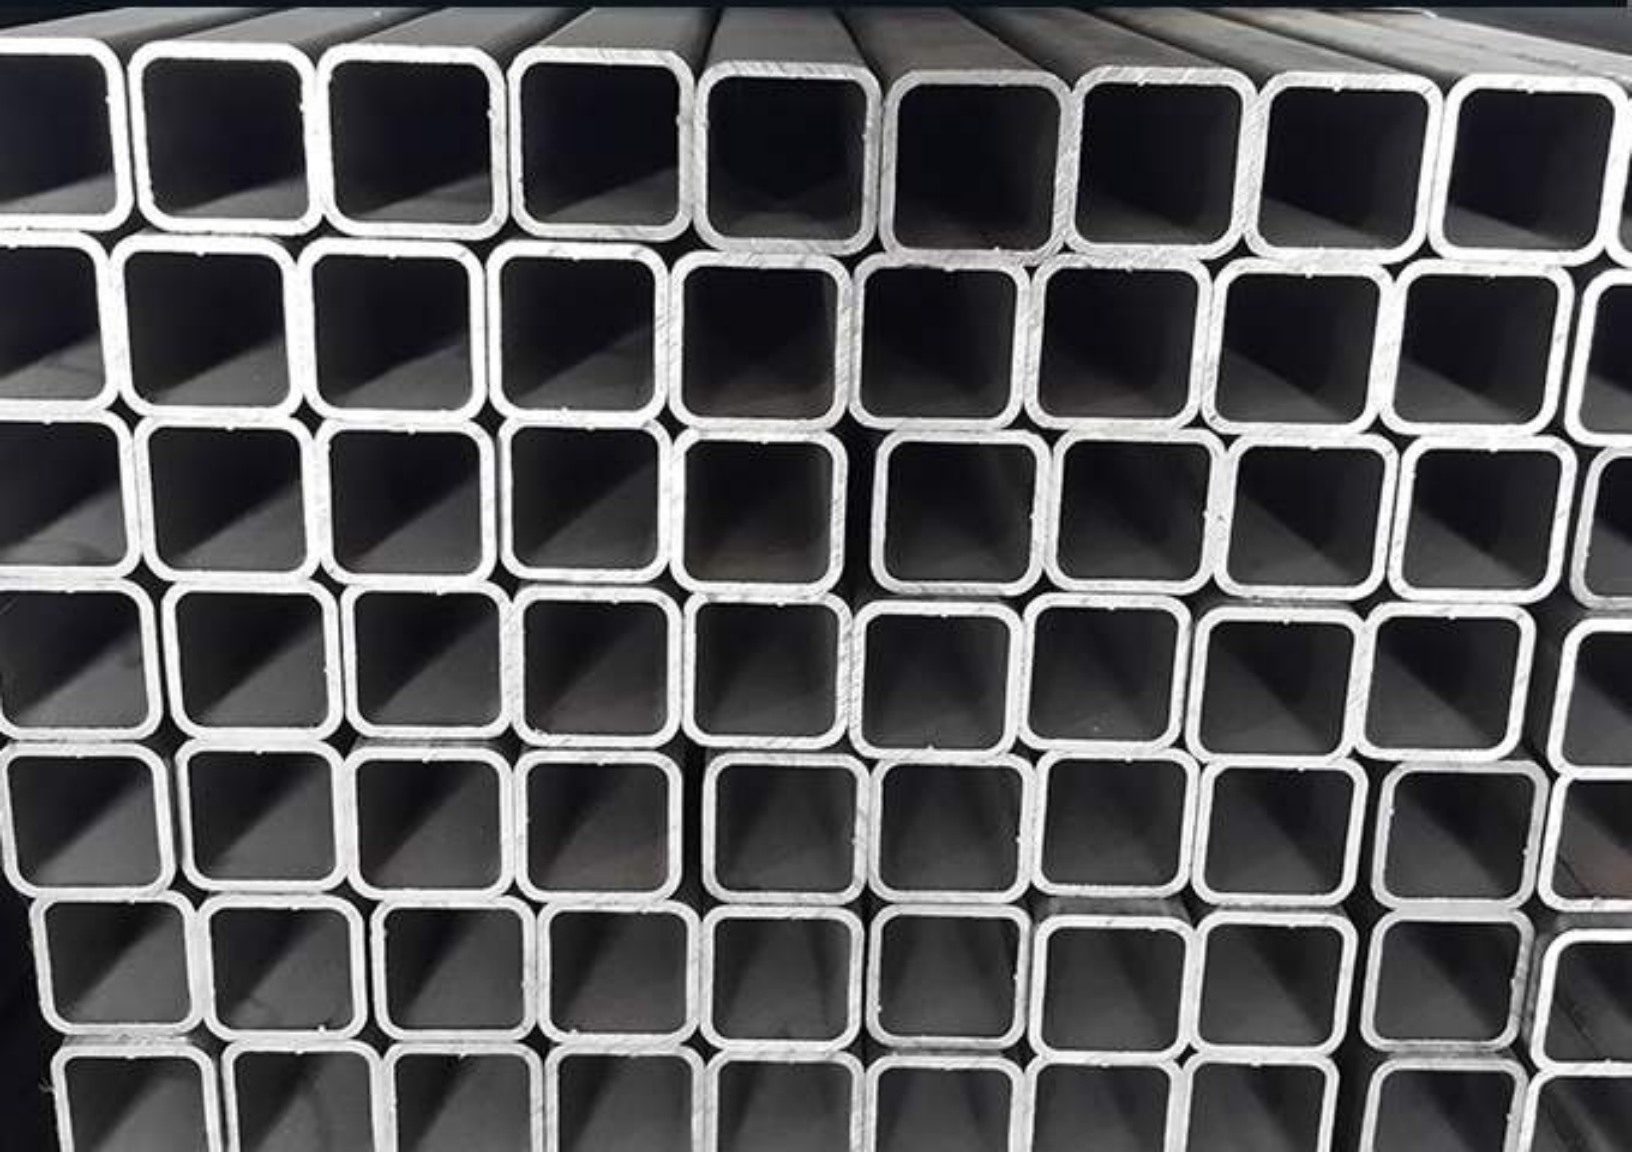

- to add value to our country and community
- to be “best” and “most reliable” one forever
- to be aware of the fact that our resource of competent people is our most crucial capital
- to produce without swerving from quality
- to create new added values with our experiences

KARÇEVİK METAL

Square and Rectangular Box Profiles

Square and rectangular box profiles are manufactured from steel tapes with high frequency welding with quality varieties as standard and in accordance with the norms.

Industrial Pipes

Industrial pipes are produced according to chrome plating and similar applications in different grades on request, with surfaces from hot rolled, decoupled or cold rolled strips.

Hot-Rolled Sheet Metal

Hot-Rolled Sheet Metal is obtained after the rolling process at a temperature above the recrystallization temperature of the steel (1700 F and above).

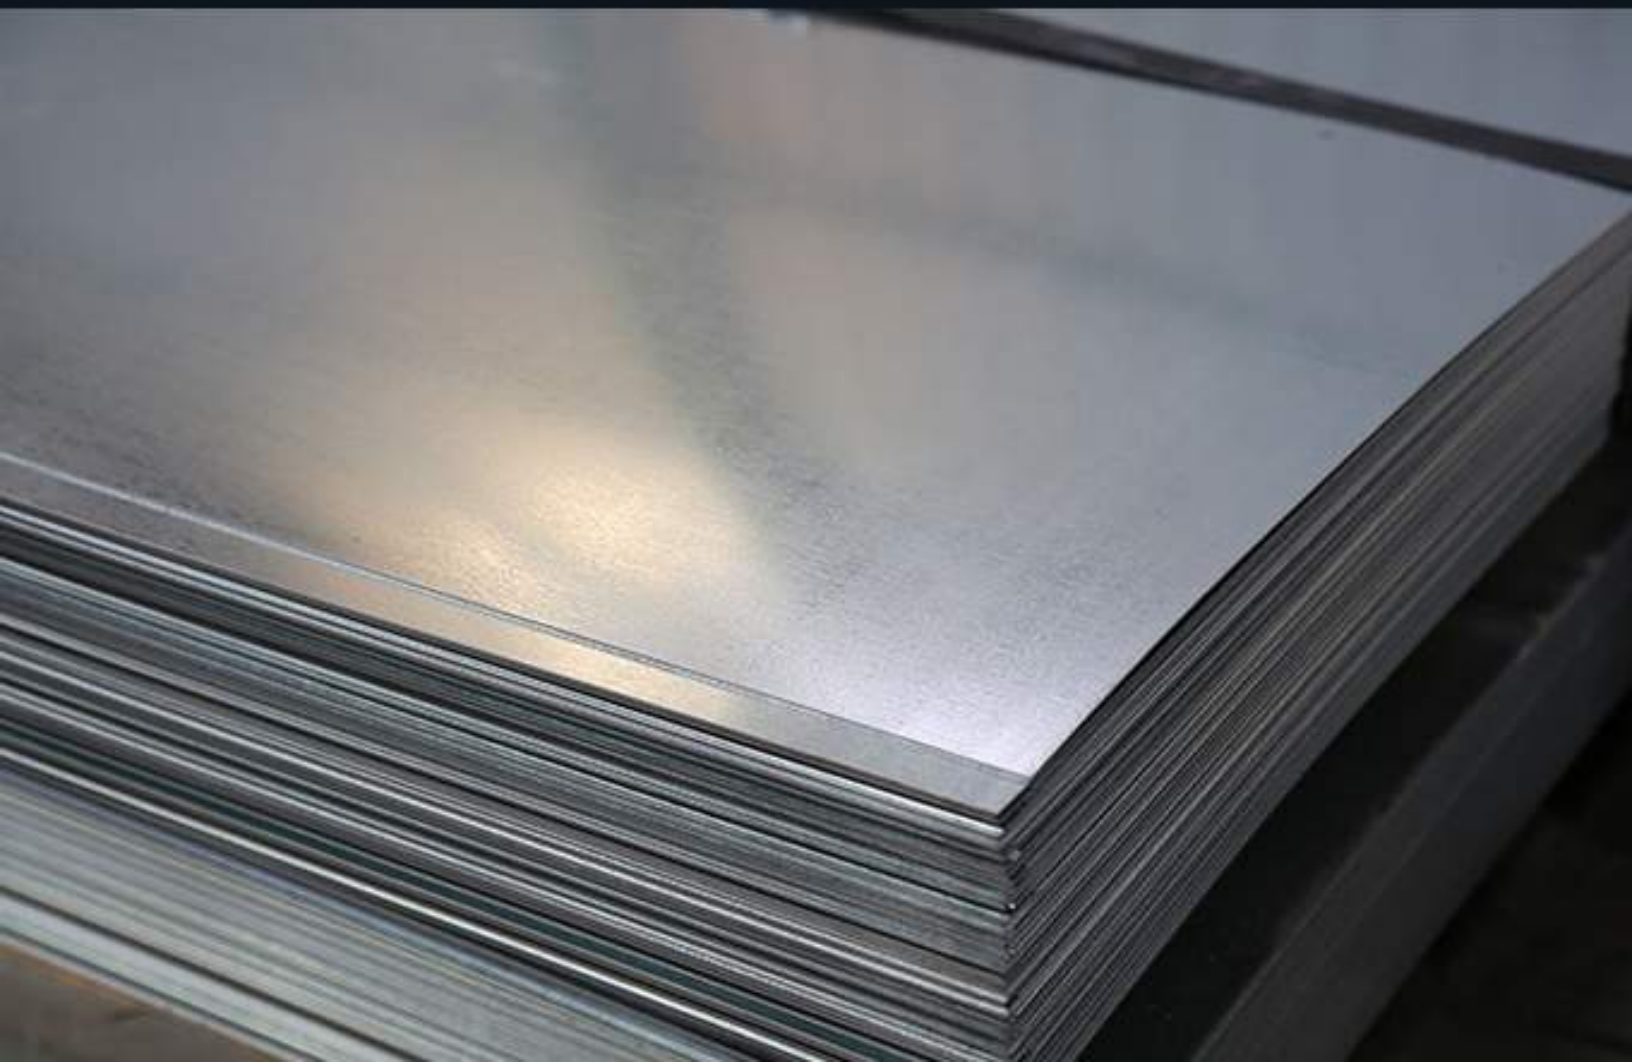

Cold-Rolled (DKP) Sheet

Cold-rolled Sheet (Steel) is mainly hot rolled sheet and it is subjected to further processing.

Galvanized Steel Sheets

Galvanized Coils and Pack Sheet are identified both surfaces are covered with zinc and made of carbon steel sheet.
